ENDURANCE WIND POWER FORMS STRATEGIC PARTNERSHIP WITH NORWIN

ENDURANCE AND NORWIN SIGN LICENSE AGREEMENT

Vancouver, BC October 2nd 2012 – [Endurance Wind Power](#) (EWP), manufacturer of advanced distributed wind turbines 5 to 50kW is size, is pleased to announce that it has formed a strategic partnership with Norwin A/S – a Danish medium wind turbine company with over 25 years of experience in the wind industry.

The partnership provides Endurance select exclusivity rights to manufacture Norwin wind turbines. The agreement will allow Endurance to manufacture, market and provide the supportive arm for the ongoing operation of all projects installed.

“Our expertise and background lies in the design of our technology but it gives us great pride to work with a company like Endurance to provide the appropriate manufacturing and support capabilities required to erect a completely successful wind project,” said Ole Sangill, chief executive officer of Norwin A/S.

Norwin’s complete mid-size product line of wind turbines includes a 200kW, 225kW, 500kW and 750kW manufactured over four continents. Their fleet comprises over 500 globally installed units with total fleet operational hours exceeding 65 million.

“Norwin has built a solid background in the engineering advancement for the wind turbine industry and it is a pleasure to manufacture a product of this caliber to serve our growing customer’s requests for turbines of this size. This will greatly extend our companies capabilities to be a leading manufacturer in the distributed wind industry,” said Glenn Johnson, chief executive officer of Endurance Wind Power, Inc.

[Endurance Wind Power](#) is a manufacturer of advanced distributed wind turbines. Their line of modern, induction-based wind turbines brings efficient, reliable, safe and quiet, renewable energy within reach of homeowners, farmers, businesses and institutions across North America, the United Kingdom and an expanding global market.

[Norwin A/S](#) is renowned for its innovative engineering and high profile within technology, and research and development in the wind turbine industry. Norwin built their company success through a unique model of licensed production of their wind turbine product line around the world.
